Summary

Full-Stack Software Engineering undergraduate with a strong foundation in **Data Structures & Algorithms**, **Object-Oriented Design**, and **System Design**, and applied experience building scalable, reliable microservices in Java, Spring Boot, Node.js, and React.

Education

Indian Institute of Information Technology, Sri City
B.Tech – Computer Science and Engineering — CGPA: 9.27/10.0

Tirupati, AP
08/2023 – Present

Experience

Infosys Springboard

Remote

Software Engineering Intern

Jul 2026 – Present

- Contributing to **FinCore Nexus**, an enterprise digital banking platform built on a layered **microservices architecture** (Angular, Java, Spring Boot, PostgreSQL) supporting a large base of active accounts with high uptime.
- Developed **Account, Customer, and Loan Service** microservices handling high-volume daily transactions and loan disbursements, using **ACID-compliant transactions** and the **Saga pattern** for distributed workflows.
- Built **IMPS/NEFT/UPI payment processing** and a **KYC microservice with OCR and face-match verification**, using an **event-driven architecture** for high-throughput, high-success-rate transaction processing.

Projects

ShelterSeek | *Node.js, Express.js, MongoDB Atlas, EJS, JWT, REST API*

[Live Demo](#)

- Built a full-stack room booking platform with **RBAC** for Travelers, Hosts, and Admins using Node.js and Express.js with JWT authentication and secure session management.
- Implemented **RESTful API** endpoints, CRUD operations, and booking workflows; deployed on Render with MongoDB Atlas, server-side EJS templating, and input validation.

Cloud-Based Disaster Recovery System | *AWS Lambda, DynamoDB, React.js, CloudWatch*

[GitHub](#)

- Architected an Active-Passive DR solution using AWS Lambda, API Gateway, DynamoDB Global Tables, and CloudWatch with automated failover; achieved **RTO <2 min** and **RPO <10 min**.
- Built a React.js frontend on AWS Amplify with Cognito authentication and cross-region replication for high availability.

SkillBridge | *Next.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, Cloudinary, Multer*

[GitHub](#)

- Built a full-stack student freelance marketplace with **RBAC** for Freelancers, Clients, and Admins using JWT authentication, refresh tokens, email verification, and a secure payment workflow with milestone tracking.
- Implemented real-time chat and notifications using Socket.IO with typing indicators, read receipts, and file sharing via Cloudinary and Multer; designed **RESTful APIs** with Express.js, Mongoose, and role-based authorization.

Technical Skills

Languages: Java, Python, JavaScript, C, SQL

Backend & Microservices: Spring Boot, Spring Cloud Gateway, Node.js, Express.js, REST API

Web Development: HTML5, CSS3, React.js, Next.js, EJS, WebSocket, Socket.IO

Databases: PostgreSQL, MongoDB, MySQL, NoSQL, Database Design

Cloud, DevOps & Security: AWS (Lambda, DynamoDB, API Gateway, Amplify, Cognito), Docker, OAuth2/JWT (IAM), Git, GitHub, CI/CD

Generative AI & ML: LLM Fine-Tuning (QLoRA, LoRA), RAG, HuggingFace Transformers, PyTorch, Scikit-learn, CNN, RNN, GCN, Diffusion Models

Core CS & Practices: **Data Structures & Algorithms**, **Object-Oriented Programming**, DBMS, Operating Systems, Computer Networks, **System Design**, **Debugging**

Achievements

Solved **400+** algorithmic and data structure problems on LeetCode, demonstrating strong **problem-solving** skills and command over space-time complexity trade-offs.

Maintained **9.27/10.0** CGPA with consistent academic excellence in Computer Science and Engineering.

Certifications

Machine Learning Specialization | *Udemy*

- Covered supervised/unsupervised learning, neural networks, deep learning, and model optimization techniques.
